Re: Complaint ID No. 257867
Act 223, Section 208 Determination
Winslow Township, Jefferson County

Dear [REDACTED]

The Department's investigation of your water supply situation at your rental property indicates that iron has been elevated above drinking water standards in the well water. The Department has determined that your water supply is affected by oil and gas well drilling. You will be contacted by Cougar Energy, Inc. in order for them to make arrangements to replace your water supply as outlined in the Oil and Gas Act.

The Department will continue to monitor your water. I have given you the laboratory analysis report for the initial water sample and will send you the results of the most recent sample.

Should you have any questions, please contact me.

Sincerely,

Douglas J. Neely
Water Quality Specialist
Oil and Gas Management
