DEPARTMENT OF ENVIRONMENTAL PROTECTION
WARREN DISTRICT OFFICE

September 27, 2010

CERTIFIED MAIL NO. [REDACTED]

Re: CID NO. 269244

[REDACTED]
Act 223 Section 208 Determination
Glade Township, Warren County

Dear [REDACTED]

The Department has investigated your February 16, 2010 complaint concerning the possible contamination of your water supply by nearby oil and gas activities.

After reviewing the results of several well water tests taken over a period of time, the Department has concluded that oil and gas activity did affect your water supply. It appears that the source was from [REDACTED]. However, the installation of a water softener by Homeland Energy appears to have corrected the problem. The results of the most recent water tests show that all drinking water parameters are well within drinking water standards and better than pre-drill water test results.

Enclosed are the complete water sample analysis results and a fact sheet to help you interpret the report. If you have any questions, or if any future issues arise, please contact me at 814-723-3273.

Sincerely,

Rick Mader
Water Quality Specialist
Oil & Gas Management
