Re: CID NO. 262473

[REDACTED]
Act 223 Section 208 Determination
Mead Township, Warren County

Dear [REDACTED]

The Department has investigated, in response to your April 10, 2009 complaint, the possible diminution of your water supply by nearby oil and gas activities.

After reviewing the results of your well water analysis, the Department has concluded that recent oil and gas activity has caused your water loss. It is my understanding that Sheffield Land and Timber drilled a water well and you agreed to install a water softener. Water test results indicated that all the parameters tested were within drinking water standards, except iron. However, the water softener should take care of this problem.

Enclosed is a copy of the water test results and a fact sheet to help you interpret them. If you have any questions, please contact me at 814-723-3273.

Sincerely,

Richard A. Mader
Water Quality Specialist
Oil & Gas Management
